Was the project completed to the owner's satisfaction? Yes No; Explanation: [Click here to enter text.](#)

Project Description (Be sure to include cost information, photos, and a detailed description of the work performed by the Vendor applicant): Although we focused on deep cleaning the pervious concrete, we also cleaned the surrounding regular concrete. The deep cleaning substantially improved the overall performance of the pervious concrete. The average infiltration rate (water flowrate) for the pervious concrete increased by 72% after the deep cleaning.

Our Cleaning involved dry vacuuming the majority of the pervious concrete and portions of the regular concrete. We followed up with a Cyclone machine that uses hot water and pressure washing with suction on the regular concrete. We also used this Cyclone machine and a Bunyan machine for the pervious concrete. The Bunyan machine uses pressure washing with vacuum. Reports provided to the client includes summary of the above along with a graph of infiltration rate improvement.

Project Information:

Project Name: UIC – Lot 1 A, Dry Vacuuming 2 x per year

Address/City/State/Zip: 1109 West Harrison Street, Chicago, IL 60607

Type of green infrastructure installed (check all that apply):

Green Roofs

Native Landscaping

Rain Barrels

Constructed Wetlands

Porous Pavement

Cisterns

- Stormwater Trees
- Bioswales

- Rain Gardens
- Soil Amendments

Project Description (Be sure to include cost information, photos, and a detailed description of the work performed by the Vendor applicant): This work dry vacuumed the pervious concrete at this site. Percentage Improvement Post-cleaning Infiltration rates: 285% The average, infiltration rate after cleaning was outstanding. Reports provided to the client includes summary of the above along with a graph of infiltration rate improvement.

Your First Choice for
Pervious Pavement
Cleaning and Renewal

Protect your investment and the environment with **Renew Pavement Solutions LLC**. Our cleaning service is specifically designed to care for and properly maintain pervious pavement, paver blocks, as well as all other standard pavement surfaces.

Renew Pavement Solutions LLC is the preferred vendor to Chicago's own **Ozinga Concrete** —the country's leading developer and provider of pervious pavement material.

PERVIOUS CONCRETE

PERVIOUS PAVER BLOCKS

STANDARD CONCRETE

With proper maintenance from **Renew Pavement Solutions**, pervious concrete is an efficient and inexpensive storm water maintenance solution.
