

LAWN & LAND FORUM

NATURAL LAWN CARE WORKSHOP

An evening workshop covering fall natural lawn care to protect pollinators at home.

NOVEMBER 13TH, 6:00 PM - 7:30 PM

Rotary Community Room – Milwaukee Central Library

814 West Wisconsin Avenue, Milwaukee, WI 53233

Pollinator populations have declined by 25% in most areas of the US. During this session, two speakers will discuss how we can halt this pollinator decline and even reverse it!

First, Midwest Grows Green's Ryan Anderson covers the far-reaching environmental and health effects of the US lawn & garden sector and the need to follow the cost-effective, more biologically sound approach of natural lawn care. Anderson, also, shares eco-lawn information for those homeowners who want both a pollinator-friendly and manicured backyard.

Second, Zoological Society of Milwaukee's Toby Seegert shares how community members can support pollinators by participating in No Mow May or other similar movements. Interested? Learn more about No Mow May Milwaukee at bit.ly/NoMowMayMKE

WHO SHOULD ATTEND: Homeowners or community members interested in protecting pollinators in their own backyards.

SPEAKERS INCLUDE: Midwest Grows Green's Ryan Anderson and Zoological Society of Milwaukee's Toby Seegert.

REGISTER AT: bit.ly/Pollinatorsathome

MORE QUESTIONS: Contact Ryan Anderson at randerson@ipminstitute.org or 773-878-8245.
